Hiring Management Team
Rem

To whom it may concern:

I am excited to apply for the Founding Full-Stack Software Engineer position at Rem. With extensive experience in full-stack development, cloud infrastructure design, and secure software solutions, I am eager to contribute to your mission of transforming the health insurance industry by making it more accessible and transparent. The opportunity to build AI-powered software that simplifies complex health plan decisions aligns with my passion for using technology to create meaningful change.

At by The Lindemans, LLC, I led full-stack development projects using JavaScript and Python, building both backend data structures and user-friendly front-end interfaces. I deployed and maintained cloud-based applications on AWS, ensuring security, scalability, and compliance. My expertise with Terraform allowed me to manage infrastructure as code, streamlining deployments and enhancing system reliability.

In my role at Tolleson Union High School District, I worked with cross-functional teams to develop and deploy secure software solutions. I gained hands-on experience troubleshooting, optimizing APIs, and ensuring compliance with best practices, skills that are essential to the mission at Rem. These experiences have prepared me to thrive in fast-paced environments and collaborate effectively to deliver impactful solutions.

The opportunity to join Rem as a founding engineer excites me. I am passionate about building scalable, secure, and user-centric software, and I look forward to applying my skills in Java, Python, React, Node, AWS, and Terraform to develop solutions that improve access to health coverage. Working alongside a talented, mission-driven team to reshape the health insurance industry would be an incredible opportunity.

Thank you for your time and consideration. I would welcome the opportunity to further discuss how my background and skills align with the goals of Rem.

Respectfully,
Enoch Lindeman
