Hiring Management Team
Culligan

To whom it may concern:

I am writing to express my interest in the IT Systems Engineer position at Culligan. With my extensive experience in deploying Microsoft and Azure technologies, cloud migrations, and network infrastructure management, I am excited about the opportunity to contribute to Culligan's operations across the West Coast. My strong background in IT systems engineering and commitment to business enablement align well with the responsibilities of this role.

In my current role as an IT Support Specialist at Tolleson Union High School District, I manage Azure infrastructure, automate processes using PowerShell, and support multi-domain Active Directory environments. I have been actively involved in cloud migration projects, transitioning on-premise workloads to Azure for better scalability and performance. My experience in managing network devices, DNS, and DHCP in complex environments has further prepared me to handle the challenges of this role.

I am particularly skilled in creating and managing GPOs, working with Azure AD and SSO, and using Microsoft Intune for endpoint management. I am confident that my problem-solving skills, critical thinking, and proactive approach to technology optimization will enable me to deliver effective solutions at Culligan. I am also enthusiastic about collaborating with other teams to drive business outcomes through the strategic use of technology.

The opportunity to be a part of Culligan's innovative approach to technology, with a focus on both on-premise and cloud infrastructure, is highly appealing. I am excited to contribute my expertise in system strategy, performance management, and automation to help enhance Culligan's IT systems and support its business growth across the region.

Thank you for considering my application for the IT Systems Engineer position. I look forward to the opportunity to discuss how I can contribute to Culligan's success and support its mission of business enablement through modern technology solutions.

Respectfully,
Enoch Lindeman
