Hiring Management Team
centrexIT

To whom it may concern:

I am excited to apply for the Onsite IT Manager position at centrexIT, where I can bring my experience in managing IT infrastructure, leading technical teams, and ensuring reliable operations for business-critical systems. With over five years of hands-on experience in IT management, I am well-equipped to act as the single point of accountability for clients' IT environments while maintaining compliance, security, and operational excellence.

In my current role as an IT Manager, I lead a dedicated team in maintaining server environments, network infrastructure, and compliance with industry standards such as HITRUST and HIPAA. I am skilled in managing Windows Server, VMware, Active Directory, and network security protocols, ensuring system uptime and resolving technical issues promptly. Additionally, I prioritize clear communication and collaboration, aligning IT initiatives with business objectives and maintaining strong client relationships.

I am particularly drawn to centrexIT's commitment to delivering IT solutions with C.L.A.S.S., as it aligns with my values of providing Care, Leadership, Accountability, Service, and Speed. I am eager to contribute to the proactive management of client IT environments, ensuring seamless operations and continuous improvement.

Thank you for considering my application. I look forward to discussing how my skills and experience can contribute to the success of centrexIT and its clients.

Respectfully,
Enoch Lindeman
