Hiring Management Team
General Atomics Aeronautical Systems, Inc.

To whom it may concern:

I am writing to express my interest in the Senior Software Developer position at General Atomics Aeronautical Systems, Inc. With over nine years of experience in enterprise software development, specializing in C++ and Python, I am excited about the opportunity to contribute to your team's mission to create advanced solutions for remotely piloted aircraft and high-resolution surveillance systems.

In my current role, I lead the development of cross-platform enterprise software, including AI-driven applications and data management systems. My expertise in C++ on both Linux and Windows, combined with a deep understanding of XML and performance optimization techniques, enables me to deliver scalable, efficient solutions that align with customer needs. I have also successfully led cross-functional teams and mentored junior developers, ensuring projects are completed on time and meet technical specifications.

General Atomics' focus on developing innovative technologies to enhance defense and intelligence capabilities resonates with my passion for solving complex software challenges. I am particularly excited by the prospect of contributing to AI applications within your organization, as well as representing your team as a technical expert in industry forums.

I look forward to the opportunity to contribute to your continued success and would welcome the chance to discuss how my skills can align with the goals of General Atomics. Thank you for your consideration.

Respectfully,
Enoch Lindeman
