Hiring Management Team
Fish Richardson

To whom it may concern:

I am excited to apply for the Technology Specialist position at Fish & Richardson, where I can leverage my technical expertise in Computer Science and passion for intellectual property to support innovative clients. With a Master's degree in Computer Science and hands-on experience in drafting patent applications, I am eager to contribute to Fish's industry-leading IP practice.

In my current role as a Patent Analyst Intern, I draft technical descriptions, conduct prior art searches, and collaborate with inventors to translate complex technologies into clear patent applications. My background in CPU design and virtual memory management aligns well with the technical requirements of this position, and I am committed to supporting patent prosecution and litigation efforts by providing accurate and insightful technical analysis.

I am particularly drawn to Fish's renowned reputation and the opportunity to work on cutting-edge technologies with top-tier clients. I am excited about the chance to contribute to the firm's success, learning from experienced practitioners, and advancing my career in the field of intellectual property.

Thank you for considering my application. I look forward to the opportunity to discuss how my skills and experience align with Fish & Richardson's goals.

Respectfully,
Enoch Lindeman
