Hiring Management Team
Affirm

To whom it may concern:

I am thrilled to apply for the Software Engineer position on the Identity Foundations team at Affirm. With over two years of experience in software development, including building and maintaining cloud-based systems using Python and AWS, I am confident in my ability to contribute effectively to your team. My strong background in working with data frameworks such as Spark, Kafka, and Kubernetes, combined with my passion for delivering high-quality code, aligns well with Affirm's mission of building secure, user-friendly systems.

In my recent role as a Software Engineer at by The Lindemans, I developed and optimized backend services using Python and AWS, improving system performance and scalability. I also worked closely with cross-functional teams, including product and engineering, to ensure that system changes met business requirements. I am particularly excited about the opportunity to work on the Identity Foundations team, where I can leverage my experience in managing data pipelines and implementing best practices to improve user conversion rates and system efficiency.

I am impressed by Affirm's commitment to innovation and transparency, and I am eager to contribute to the Consumer Identity Safeguard Domain. I look forward to bringing my expertise in software engineering, cloud services, and data frameworks to your team. Thank you for considering my application. I would be honored to further discuss how my skills and experience align with Affirm's vision.

Respectfully,
Enoch Lindeman
