Hiring Management Team
DLT Solutions

To whom it may concern:

I am excited to apply for the Systems Engineer position at DLT. With a strong background in cloud infrastructure, backup solutions, and system administration, I am eager to contribute to your 24/7 enterprise customer support team. My experience in AWS, Red Hat, Veritas, and Infrastructure-as-Code (IaC) aligns well with the technical requirements of this role.

As a Cloud Engineer at by The Lindemans, I provided Tier 1 support for AWS, Red Hat, and backup solutions, troubleshooting complex issues and ensuring optimal performance. I used Infrastructure-as-Code tools like Terraform and scripting (Python, Bash) to automate workflows and enhance infrastructure management. My work included documenting solutions, conducting product training, and supporting system architecture improvements to ensure continuity of operations.

In my role as a Linux Systems Administrator at Tolleson Union High School District, I managed Red Hat servers, implemented backup and disaster recovery solutions, and optimized virtualized environments. I collaborated with team members to improve system reliability and created technical documentation for troubleshooting and infrastructure management. My ability to communicate technical information clearly and effectively supports both internal teams and customer-facing roles.

I am particularly excited about this opportunity at DLT because of the focus on providing excellent customer support and leveraging cutting-edge cloud technologies. My technical expertise, proactive approach, and commitment to improving system performance make me an excellent fit for this position.

I would welcome the opportunity to discuss how my experience aligns with the Systems Engineer role at DLT. Thank you for considering my application. I look forward to the possibility of contributing to your team and supporting your mission.

Respectfully,
Enoch Lindeman
