Hiring Management Team
Ledgent Technology

To whom it may concern:

I am excited to apply for the Software Manager position at Ledgent Technology in Vista, CA. With over 10 years of software development experience and more than 5 years in managerial roles, I bring extensive expertise in leading cross-functional teams and delivering high-quality software solutions.

In my current role, I manage a team of 10+ developers, leading projects from concept to deployment. My experience spans Java development, SQL database integration, and embedded Linux environments. I have successfully led the development of web-based services and REST APIs using Apache and PHP, ensuring scalability and cross-platform compatibility. Additionally, I have a strong background in project management, including task definition, budget tracking, and timeline management, ensuring that project goals are consistently met.

I am particularly drawn to this opportunity because of Ledgent Technology's focus on innovation and collaboration in the voting systems space. My experience leading the development of secure, scalable software solutions, as well as my hands-on programming skills, aligns well with the responsibilities of this role.

I look forward to the opportunity to contribute my expertise in software management and development to your team. Thank you for considering my application, and I am eager to discuss how my skills align with your company's needs.

Respectfully,
Enoch Lindeman
