Hiring Management Team
CTG

To whom it may concern:

I am writing to express my interest in the Software Engineer position at CTG. My experience in developing cloud-based microservices, automating infrastructure, and supporting data-driven applications aligns well with the duties outlined in your job description. I am particularly excited about contributing to the development of data-centric clinical and analytic applications that can improve patient care outcomes. In my role at Tolleson Union High School District, I led the deployment and support of cloud-integrated applications that reduced manual workloads and improved system response times by over 30%. I also created backend solutions leveraging REST APIs, Microsoft Power Apps, and Office365 integrations, ensuring high availability and fast data retrieval for 14,000 users. These achievements reflect my ability to manage scalable systems and handle complex technical challenges, skills essential for this role at CTG.

I have a solid foundation in cloud environments, including experience with both Google Cloud and Microsoft Azure. Additionally, I have automated infrastructure deployments using Terraform, Docker, and Azure Pipelines to ensure seamless application scaling and reliable uptime. My knowledge of backend development and DevOps practices, combined with my commitment to Agile methodologies, positions me to be a strong contributor to your engineering team.

What excites me about joining CTG is the opportunity to collaborate with talented engineers and contribute to innovative projects that make a tangible impact on patient care. I am eager to bring my skills in Python, REST APIs, cloud architecture, and automation to your team and help drive the success of your data-centric applications.

I look forward to the opportunity to discuss how my background, skills, and passion for backend development can contribute to CTG's mission. Thank you for considering my application.

Respectfully,
Enoch Lindeman
