Hiring Management Team
Humata Health

To whom it may concern:

I am writing to express my interest in the Senior Backend Software Engineer position at Humata Health. With extensive experience in backend systems development, microservices architecture, and cloud platforms, I am excited about the opportunity to contribute to Humata Health's mission of leveraging AI and automation to streamline healthcare technology. Your focus on improving prior authorization solutions resonates with my passion for developing scalable and secure software that makes a meaningful impact.

In my recent role at Tolleson Union High School District, I implemented microservices and RESTful APIs using C and .NET Core, enabling real-time data exchange across multiple systems. Additionally, I optimized cloud operations using Azure, ensuring high availability and minimizing latency. My experience modernizing codebases and working across Agile teams aligns with Humata Health's need for technical leadership in migrating to newer architectures.

At by The Lindemans, LLC, I developed cloud-integrated applications that leveraged CI/CD pipelines and database optimizations. My background in designing resilient systems and mentoring junior developers has prepared me to take on a leadership role in driving Humata Health's backend engineering efforts. I also bring a strong understanding of secure software practices, which will be critical when handling PHI and ensuring HIPAA compliance.

What excites me most about joining Humata Health is the opportunity to build innovative healthcare solutions that directly impact patient care. I am inspired by your commitment to using AI to reduce friction in healthcare and look forward to collaborating with your cross-functional teams to define and implement technical strategies that deliver meaningful results.

Thank you for considering my application. I would welcome the opportunity to discuss how my background in backend development, cloud integration, and software modernization aligns with Humata Health's engineering goals. I look forward to the possibility of contributing to your team and helping advance the future of healthcare technology.

Respectfully,
Enoch Lindeman
