

ENOCH LINDEMAN

Backend Engineer / Full Stack Developer

in www.linkedin.com/in/enoch-lindeman

San Diego, CA

EXPERIENCE

Owner & Backend Developer

Dec 2022 – Ongoing

Developed cloud-based wellness app with Python backend

- Designed serverless architecture for data processing, using AWS Lambda to handle high-throughput data processing.
- Built Python-based RESTful APIs for data transformation and integration with third-party services.

Mission Technology Specialist

May 2020 – May 2022

Developed cloud-based support app for 14,000 users

- Created a Microsoft Power App that integrated with cloud platforms to provide real-time data to users.
- Reduced support requests by over 90% and streamlined internal workflows with automated solutions.

Tolleson Union High School District

Led large-scale deployment and system maintenance

- ongoing backend support to ensure system scalability and stability.
- · Optimized network processes and troubleshooting to maintain high service availability.

Avondale, AZ

Managed the deployment of 3,000 devices, providing

The Church of Jesus Christ of Latter-Day Saints

Developed backend systems for remote operations

- Supported over 3,000 users by building backend services that facilitated the shift from in-person to fully remote operations.
- Created API integrations to streamline communications and enable smooth remote interactions.

Automated administrative processes

- manual workload by 80%.
- Led the development of a task management system to improve resource allocation and time management.
