

Hiring Management Team Solar Turbines, a Caterpillar company

## To whom it may concern:

I am excited to apply for the Entry-Level Engineer position within the Technology and New Product Introduction (NPI) Engineering Rotation Program at Solar Turbines, a Caterpillar company. As a recent Mechanical Engineering graduate with hands-on experience in mechanical design, performance testing, and sustainability-focused engineering projects, I am eager to contribute to the innovative efforts of Solar Turbines in reducing emissions and improving energy efficiency.

In my recent internship at XYZ Engineering Solutions, I collaborated with engineers to develop CAD models, conduct performance testing, and support the optimization of mechanical systems for efficiency and reliability. I also worked on projects aimed at reducing emissions by experimenting with new materials, documenting results, and presenting findings to the engineering team. My technical knowledge, combined with strong communication and problem-solving skills, aligns well with the core goals of the NPI Engineering Rotation Program.

I am particularly excited about the opportunity to engage in rotations across departments such as Mechanical Design, Combustion, and Engine Performance, which will enable me to broaden my expertise and contribute to Solar Turbines' mission of advancing gas turbine technology. I am committed to supporting Solar Turbines' sustainability and carbon reduction initiatives, leveraging my engineering fundamentals and adaptability to drive positive outcomes.

The opportunity to be part of a collaborative team that values innovation, sustainability, and professional growth aligns perfectly with my career aspirations. I am confident that my technical background, proactive approach, and enthusiasm for learning will make me a valuable addition to Solar Turbines' Engineering Rotation Program.

Thank you for considering my application for the Entry-Level Engineer position at Solar Turbines. I look forward to the opportunity to discuss how my skills and experience can contribute to the company's innovative solutions for the energy transition.

Respectfully, Enoch Lindeman
