ENOCH LINDEMAN

Python Developer / Backend Engineer Flask Developer / Containerization API Specialist

in www.linkedin.com/in/enoch-lindeman ♀ San Diego, CA

EXPERIENCE

Python Developer / Backend Engineer

math Dec 2022 – Ongoing

by The Lindemans **♀** Glendale, AZ

Developed backend systems and APIs using Python and Flask

- Built and maintained Flask-based backend services, ensuring the efficient development of RESTful APIs for data processing and integration
- Designed and deployed containerized applications using Docker and Docker Compose, streamlining the deployment process to cloud environments

Collaborated on cloud deployment and data movement

- Integrated backend services with cloud infrastructure, ensuring system scalability and reliability across distributed systems
- Automated data movement between systems using Python scripts, ensuring data consistency and optimizing performance

Mission Technology Specialist

May 2020 – May 2022

Developed backend Python applications for internal tools

- · Built backend services using Python to automate data movement and optimize system performance, reducing manual effort by 30%
- Managed containerized applications with Docker, improving the deployment pipeline and reducing development time by 25%

The Church of Jesus Christ of Latter-Day Saints Svracuse, NY

Ensured system reliability and performance through testina

- Conducted thorough testing and debugging of backend systems, ensuring high system reliability and minimizing performance issues
- Collaborated with cross-functional teams in an Agile environment to continuously improve system functionality and user experience

EDUCATION

August 2024

Bachelor of Science in Technological Entrepreneurship and Management Expected May 2026

Arizona State University

Online

• Relevant coursework: Python Development, API Design, Software Engineering, Cloud Infrastructure

Associate of Science in Computer Science

Rio Salado College

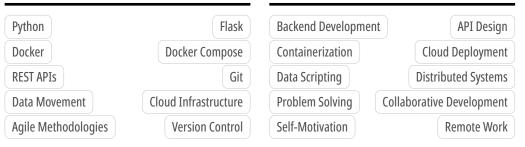

▼ Tempe, AZ

Graduated Summa Cum Laude, 3.9 GPA, focused on software development and process design

SUMMARY

Python Developer with over 3 years of experience in backend systems, data scripting, and API development. Proficient in building and deploying Flask-based applications, containerizing services using Docker and Docker Compose, and managing cloud infrastructure. Strong understanding of REST APIs and data movement across distributed systems. Familiar with Agile methodologies and version control systems (Git). A self-motivated problem-solver, capable of working effectively in remote environments.
