San Diego, CA

# SUMMARY

Application Support Engineer with extensive experience in Hadoop administration (Cloudera, Spark, Hive, Impala) and Red Hat Linux systems. Skilled in leading multi-functional teams during incidents, managing deployments, and troubleshooting critical issues in fast-paced environments. Adept at working with SDLC methodologies, identifying process improvements, and maintaining Standard Operating Procedures (SOPs). Proven ability to take charge during service disruptions and communicate effectively with senior leadership.

# **EXPERIENCE**

# Application Support Engineer / Hadoop Administrator

Jun 2022 – Ongoing

**▼** 3a

Tolleson Union High School District

San Diego, CA

by The Lindemans

San Diego, CA

Led multi-functional teams during service disruptions and new deployments

- Organized response efforts to resolve critical incidents, coordinating across stakeholders to restore services with minimal downtime.
- Managed Hadoop clusters (Cloudera, Spark, Hive) and optimized data pipelines for high-performance analytics platforms.

Performed software upgrades and incident resolution independently

- Deployed and upgraded systems on Red Hat Linux, ensuring smooth operations and enhanced security.
- Identified root causes and documented best practices to prevent recurrence of issues, reducing incidents by 20

**Owner & Technical Lead** 

Dec 2022 – Ongoing

- Managed and led service implementations and product rollouts
- Developed and maintained Standard Operating Procedures (SOPs) for system configurations and deployments.
- Integrated Hadoop administration tools with Linux environments, streamlining workflow automation by 30
- Provided continuous process improvement recommendations
- Introduced performance monitoring frameworks that improved issue detection and reduced resolution times.
- Collaborated with cross-functional stakeholders on SDLC-based projects, ensuring alignment between development and operations.

#### Mission Technology Specialist

May 2020 – May 2022

The Church of Jesus Christ of Latter-Day Saints

**♀** Syracuse, NY

- Supported distributed applications and ensured system uptime
- Monitored and managed distributed systems, ensuring smooth operations on Red Hat Linux platforms.
- Led incident resolution efforts, providing on-call support and coordinating with stakeholders for seamless service recovery.

Developed tools for process automation and enhanced system monitoring

- Reduced manual interventions by automating routine tasks with scripts, improving productivity by 25
- Communicated incident resolution strategies effectively with senior leaders and stakeholders.

#### EDUCATION

# Bachelor of Science in Technological Entrepreneurship and Management

Expected May 2026

Arizona State University

**♀** Online

- Current GPA: 4.0
- Coursework includes Systems Development, Linux Administration, and Data Analytics.

# Associate of Science in Computer Science

Rio Salado College ▼ Tempe, AZ

August 2024

- Graduated Summa Cum Laude, GPA: 3.9
- Specialized in Distributed Systems, SDLC, and Process Automation.

# **SKILLS**

Hadoop Administration (Cloudera, Spark, Hive, Impala) Red Hat Linux Systems Development Life Cycle (SDLC) Incident Resolution and Troubleshooting

Process Automation Standard Operating Procedures (SOPs) Cross-functional Collaboration On-call Support Leadership in Crisis Situations
