Hiring Management Team
Harpin

To whom it may concern:

I am excited to apply for the Full Stack Principal Engineer role at Harpin AI. With over 7 years of experience developing scalable software solutions, specializing in **React** for the frontend and **Java** and **Python** for the backend, I am eager to bring my expertise to your team. My passion for delivering innovative, high-impact solutions and mentoring engineering teams aligns perfectly with Harpin AI's mission of revolutionizing enterprise identity data management.

In my current role at by The Lindemans, I have developed full-stack applications using **React** for dynamic user interfaces and implemented **RESTful APIs** using **Java** and **Python** for backend services. I also manage the integration of **SQL** and **NoSQL** databases, optimizing data retrieval and system performance. My experience leading technical discovery sessions with clients and collaborating with cross-functional teams has enabled me to deliver tailored software solutions that drive business growth.

At Tolleson Union High School District, I led full-stack development projects, focusing on building responsive user experiences and scalable backend systems. I introduced best practices for code quality and performance optimization, which resulted in a 40% increase in overall system efficiency. I also mentored junior engineers, fostering an environment of continuous learning and innovation.

I am particularly excited by Harpin AI's innovative approach to improving data quality and integrity across the enterprise ecosystem. I would welcome the opportunity to contribute my skills in **full-stack engineering** and leadership to your Client Solutions team. Thank you for considering my application. I look forward to the opportunity to discuss how my background and experience align with your goals.

Respectfully,
Enoch Lindeman
