ENOCH LINDEMAN

Cloud Product Engineer / AWS Specialist
Cloud Infrastructure Automation Expert

✉ enoch@lindeman.family   📞 (619) 333-8221
in www.linkedin.com/in/enoch-lindeman   📍 San Diego, CA

EXPERIENCE

Information Technology Support Specialist
Tolleson Union High School District

📅 Jun 2022 – Ongoing   📍 Avondale, AZ

Developed cloud infrastructure solutions using AWS
- Designed and deployed AWS infrastructure components, including VPCs, IAM roles, and automation tools for seamless cloud operations
- Led the development of self-service tools to enable developers to easily manage and deploy cloud applications, reducing manual intervention by 40%

Implemented CI/CD pipelines and monitoring tools
- Built and maintained CI/CD pipelines using infrastructure as code to streamline deployments and improve system reliability
- Deployed monitoring and alerting solutions using AWS CloudWatch and Datadog to ensure platform performance and uptime

Owner & Software Developer
by The Lindemans

📅 Dec 2022 – Ongoing   📍 Glendale, AZ

Designed and deployed AWS cloud-based infrastructure
- Architected cloud solutions on AWS, leveraging automation tools like Terraform and AWS CLI to manage infrastructure and deployments
- Integrated AWS IAM and Microsoft Entra ID to manage access control and security, ensuring compliance with organizational policies

Led infrastructure optimization and scaling projects
- Optimized cloud infrastructure for scalability and performance, ensuring efficient resource utilization and cost savings
- Developed comprehensive log analytics solutions using open-source tools, providing full visibility into application performance

Mission Technology Specialist
The Church of Jesus Christ of Latter-Day Saints

📅 May 2020 – May 2022   📍 Syracuse, NY

Built and managed cloud services and infrastructure
- Designed and implemented cloud-based systems for remote support and infrastructure management, optimizing reliability and security
- Collaborated with engineering teams to resolve complex infrastructure issues, ensuring timely delivery of cloud services

Developed automated monitoring and alerting systems
- Created robust monitoring solutions using AWS CloudWatch and Datadog to detect performance issues and ensure high availability
- Led incident response and postmortem efforts to troubleshoot performance and availability issues across distributed systems

EDUCATION

Bachelor of Science in Technological Entrepreneurship and Management
Arizona State University

📅 Expected May 2026   📍 Online

SUMMARY

Cloud Product Engineer with over 7 years of experience building, deploying, and managing cloud platforms, with a strong focus on AWS cloud services, automation, and infrastructure as code. Skilled in developing and maintaining scalable, reliable cloud solutions while driving operational excellence and process optimization. Proven ability to lead engineering teams, mentor developers, and ensure cloud platforms meet SLAs and business objectives.

TOOLS

- AWS Cloud (VPC, IAM, Organizations)
- CLI
- Infrastructure as Code (IaC)
- Automation
- AWS CloudWatch
- Datadog
- Continuous Delivery (CI/CD)
- New Relic
- ElastiCache
- SCP Policies
- Microsoft Entra ID
- AWS Deployment

SKILLS

- Cloud Engineering
- AWS Infrastructure
- Automation Monitoring
- Troubleshooting
- Test Driven Development
- Operational Excellence
- Cross-Team Collaboration
- Paired Programming
- Mentoring and Leadership
- Cloud Scaling

Authorized to work in the US for any employer
References available upon request

- Relevant coursework: Cloud Infrastructure, AWS Services, System Design, Automation
