in www.linkedin.com/in/enoch-lindeman   📍 San Diego, CA

SUMMARY

Systems Analyst with over 4 years of experience in gathering system requirements, creating technical documentation, and driving enterprise integration projects. Strong expertise in SQL, data modeling, and Agile methodologies such as Scrum and Kanban. Proven ability to collaborate with cross-functional teams to develop system solutions that align with business needs. Skilled in utilizing tools like JIRA, Confluence, and AWS to enhance system efficiency and ensure project success.

EXPERIENCE

Information Technology Support Specialist
📅 Jun 2022 – Ongoing

Tolleson Union High School District
📍 Avondale, AZ

Led system analysis and requirements gathering for IT projects
- Gathered system requirements for enterprise-wide IT projects, ensuring alignment with business goals and system capabilities
- Developed detailed technical specifications and user stories to guide cross-functional teams in the development and integration of system solutions

Managed backend testing and SQL-based systems
- Performed hands-on backend testing, including SQL query testing, to ensure data integrity and optimal system performance
- Collaborated with development teams to troubleshoot system issues and optimize system performance using Agile methodologies

Owner & Software Developer
📅 Dec 2022 – Ongoing

by The Lindemans
📍 Glendale, AZ

Gathered system requirements and developed technical documentation
- Led system analysis for cloud-based solutions, documenting system requirements, technical specifications, and integration approaches
- Developed process flow diagrams, user stories, and use cases to communicate system functionality and integration requirements

Collaborated with development and QA teams
- Worked closely with developers and QA teams to ensure that requirements were met and system solutions aligned with customer needs
- Participated in Agile ceremonies, including sprint reviews and retrospectives, to optimize team performance and project outcomes

Mission Technology Specialist
📅 May 2020 – May 2022

The Church of Jesus Christ of Latter-Day Saints
📍 Syracuse, NY

Managed system requirements and technical documentation
- Analyzed system requirements for remote management tools, collaborating with stakeholders to ensure that solutions met business and technical needs
- Maintained technical documentation for cloud-based systems, ensuring up-to-date and accurate records for future enhancements

Conducted backend testing and troubleshooting
- Led SQL-based testing and troubleshooting for large-scale systems, ensuring system reliability and performance
- Collaborated with engineering teams to resolve integration issues and ensure timely delivery of system changes
