Hiring Management Team
Company Name

To whom it may concern:

I am writing to express my excitement for the Technical Support Engineer position at Red Hat. With my extensive experience in Linux system administration, process automation, and end-user support, I am confident in my ability to contribute effectively to your team. Currently pursuing a Bachelor of Science in Technological Entrepreneurship and Management, I am committed to continuous learning and staying at the forefront of technological advancements.

In my role as an IT Support Specialist at Tolleson Union High School District, I oversaw the deployment of 3,000 devices, providing network support and ensuring device security. I also developed a Microsoft Power App that reduced user information requests by 90

While I am working towards obtaining the RHCSA certification, I have a solid foundation in Linux system administration and scripting, including Python and Bash. I am eager to expand my expertise in Red Hat products such as RHEL and contribute to developing innovative solutions for enterprise customers.

I am drawn to Red Hat's mission of fostering collaboration and providing outstanding customer service. My technical skills, problem-solving approach, and passion for delivering high-quality support make me a strong candidate for this role. I look forward to discussing how my background and skills align with Red Hat's vision.

Respectfully,
Enoch Lindeman
