ServiceNow

To whom it may concern:

I am excited to apply for the Staff Software Engineer position at ServiceNow. My background in developing machine learning applications, including experience with scalable API development and optimization using NVIDIA Triton Inference Server, aligns perfectly with your team's needs. I am particularly inspired by ServiceNow's mission to enhance workflows through AI-enhanced technologies and would love to contribute to this goal with my expertise.

In my current role at Tolleson Union High School District, I developed a support application using Microsoft Power Apps that integrated Office365 and SharePoint, streamlining user requests by over 90At by The Lindemans, I have been developing a wellness app using Python and Rust, integrating REST APIs and optimizing performance for cross-platform use. My work on this project has honed my ability to manage full-stack development and collaborate across departments to ensure efficient product releases. These experiences reflect the kind of multi-functional collaboration and technical problem-solving ServiceNow values.

I am particularly excited by ServiceNow's leadership in leveraging AI to solve complex organizational problems. Your dedication to creating intelligent, automated workflows that empower businesses to work smarter aligns with my own passion for building scalable, impactful systems. I am confident that my skills in Python, machine learning, and scalable software design will contribute to ServiceNow's goal of making work easier and more effective for your clients.

Thank you for considering my application. I would welcome the opportunity to discuss further how I can bring my technical expertise and enthusiasm to your team at ServiceNow. I look forward to hearing from you.

Respectfully,
Enoch Lindeman
